

Israeli Medical Association World Fellowship

Dear IMA World Fellowship Members,

In honor of the Israeli Medical Association Centennial anniversary, we have set up an initiative to make a contribution to the Jewish National Fund (JNF), in order to plant a new forest or restore and preserve a forest in Israel.

The JNF is a body responsible for, among other things, the preservation of forests and wildlife in Israel. Over the past 110 years, JNF has evolved into a global environmental leader by planting 250 million trees, building over 210 reservoirs and dams, developing over 250,000 acres of land, creating more than 1,000 parks, providing the infrastructure for over 1,000 communities, bringing life to the Negev Desert and educating students around the world about Israel and the environment.

We would be happy to include you, our friends abroad, in this initiative and ask if you would like to contribute to this important project.

If you are interested in donating money to the IMA Centennial Forest Fund please contact Sivan Raz, our International Relations Officer: sivan@ima.org.il for more details.

We hope you will join us in this initiative.

Best Regards

Dr Zeev Feldman
Chairman
Israeli Medical Association
World Fellowship
