

A Word from the Chair

Dear Friends,

I am excited and proud to be elected as the new Chair of the Israeli Medical Association's World Fellowship. Along with my newly elected World Fellowship Committee members, we intend to work hard to strengthen the relationships with our colleagues and friends

from around the world.

It is important to note that the aim of the Israeli Medical Association's World Fellowship is to unite and bring together medical professionals from all over the world on a professional and social basis, and to maintain and enhance solidarity with Israel and its medical societies.

We would like to take this opportunity to review the work of the World Fellowship and to look at ways of improving the services that we offer and the work of the WF in general. We would welcome

your thoughts, feedback, and suggestions on how you would like to see the World Fellowship moving forward. You can contact the World Fellowship at international@ima.org.il

I would also like to bring your attention to some upcoming IMA Conferences. The IMA's Scientific Council's CBME Conference 'The Educator Physician, Challenges and Opportunities' will take place in October of this year, and the next in the series of medical innovation conferences 'The Future Health Matrix' will take place in June 2024 (Save the Dates below).

On behalf of the WF committee and myself, I would like to wish you all a very happy Shavuot!

Professor Hana Leiba
Chair
IMA – World Fellowship

The Israeli Medical Association
and World Fellowship wish you, your
family, and your community

A HAPPY SHAVUOT

ISRAELI MEDICAL ASSOCIATION JOURNAL – IMAJ

We are happy to inform you that the Israeli Medical Association Journal (IMAJ) is available online to all IMA World Fellowship members.

IMAJ publishes original articles and reviews, editorials, case reports and other feature columns and includes unique coverage of specific regional issues such as infectious and parasitic diseases, effects of the local environment on morbidity and mortality and Jewish genetic diseases, that are relevant to medical practice in distant countries with similar biopsychosocial problems. www.ima.org.il/imag
